I'll answer David's question during the call and let's send Avis' endorsement after the call (although I will reference it during the call as well or you can if I forget). I'll also forward his recommendations to Kary to explore.

Thankfully, the Tualatin SP-12 report was very much completed by Kari at Tetra –Tech. Other than supplying information, and a few discussions, she did it all. And she did an impressive job at finding additional data on restoration that I was not aware of.

So you can pass along that advice as well; an endorsement to let someone else talk about your basin- you might be surprised how much you will learn!

Avis thanks for your response and observation/suggestion. Will be talking about what you have mentioned. Too bad you cannot attend because we want as many staff that have written either a WQ-10 or SP-12 story to talk about how you wrote it and your experiences and suggestions. I and Jayne will try to pass along your message. Thanks, Don

Hey Don—I am not sure where my responses have gone, but I have a conflict and cannot make this meeting. As you know, the Tualatin has been an SP12 subject, so perhaps my presence is less needed. Also, the main reason that the Tualatin has not been able to count as more restoration than it does, is because it is very difficult to get the 303d status changed for impaired reaches that are now meeting WQ standards and TMDL allocation limits. I am not sure why this is so; you need to contact the 303d group for clarification on that issue.

Take care—and good luck tomorrow--Avis

Dear all, I send this as a reminder of EPA's Oregon's Watershed Measures & Waterbody Restoration Stories meeting tomorrow, Thursday. Call in Number: Ex. 6 - Personal Privacy

Ex. 6 - Personal Privacy

For HQ staff I reserved HQ - Conference Room 11 so that anybody that wants can meet together for the meeting. I will NOT be in the room with you. So someone else will need to set up the phone if need be.

Please participate in this meeting. It is important for not just EPA and HQ NPS Staff. I am concerned that many of the Basin Coordinators may not know the importance of participating. DEQ staff develop the Oregon's Watershed Measures & Waterbody Restoration Stories "Success Stories" with assistance from EPA's contractor Tetra Tech. It takes a lot of time from DEQ staff to gather the information to put the story together, as well as reviewing the information for accuracy.

We need these WQ-10 and SP-12 Success Stories so that they are included in DEQ's NPS Annual Report. DEQ must prepare these annual reports in order to receive 319 dollars from EPA. And EPA needs these Success Stories because Congress wants to know why the 319 dollars are needed and how successful they are being used. Although these stories are required by EPA, DEQ staff have found benefits in developing these stories including using the stories to publicize success and further their outreach goals.

EPA's goal in making this presentation is to educate DEQ staff on the measures in order to increase the number of potential candidates as well as brainstorm barriers to developing stories and how to overcome them. EPA also hopes for those DEQ staff who have participated in the development of stories to share their experiences.

If you need more information about the meeting please email or call me at Ex. 6 - Personal Privacy (my cell phone) while I am telecommuting. Don
